

Pizza Oven

PZ330

The PZ330 using high speed quartz/infra red elements can cook a fresh pizza up to 12 dia in under 4 minutes. From frozen cooking time is approx 6 minutes. With a stone base for an even spread of heat under the pizza you will achieve perfect results time after time. Thanks to the independent control of the top and bottom elements the PZ330 also works as a grill for toasted sandwiches etc and a warming oven. The PZ330 can be stacked up to 3 high using the PZ1 stacking bracket.

Features : 15 minute timer with constant override position; 350'C thermostat ;independent element control.
