

Bain Maries

The BM21

The BM21 is a wet heat bain marie. The food does not have direct contact with the heat source, the element is fixed below the container, but is heated through contact with the hot water (90°C). This gives an even heat across the whole container. It will accommodate two full size gastronorm containers, up to 150mm deep, or any combination of smaller containers. It is fully thermostatically controlled and is perfect for use in busy establishments.

Features heating indicator neon, safety drain tap, end on controls.

Weight	23kg
Dimensions (mm)	675 x 625 x 260
Power	3Kw – 13 amp plug
Shelf Area (mm)	2/1GN x 150mm deep
Temp C (min)	30
Temp C (max)	90
